BUILDING AN EARTHQUAKE  
RESILIENT FUTURE FOR AUSTRALIA

This year's annual meeting/conference will be held in Adelaide to mark the 70-year anniversary of the 1954 magnitude 5.4 Adelaide earthquake, which was the most destructive earthquake on record in Australia prior to the devastating 1989 Newcastle earthquake.

The theme for this year's conference is **Building an Earthquake Resilient Future for Australia**. The committee will welcome papers on this topic and other general earthquake engineering and seismology topics, including:

- Innovative structural systems to resist earthquakes
- Seismic retrofitting of existing structures
- Structural monitoring of earthquake actions
- Earthquake performance of non-structural elements
- Advances in seismology in intraplate regions
- Recent earthquakes - observations and impacts

Abstract  
submissions  
now open!

Submissions close 5 May 2024

Submit abstracts to:  
[admin@aees.org.au](mailto:admin@aees.org.au)  
(max 250 words)

## KEY DATES

Early bird registration closes: 31 August 2024

Registration closes: 10 November 2024\*

Conference: Thursday 21 to Saturday 23 November 2024

\*Late fees apply to registrations after this date

Abstract submissions close: 5 May 2024

Abstract acceptance: 26 May 2024

Paper submission deadline: 25 August 2024
